

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. – 6. (Withdrawn)

7. (Currently amended) An expandable tubular assembly, comprising:  
one or more tubular members; and  
a layer of a lubricant coupled to the interior surfaces of the tubular members;  
wherein the tubular members comprise wellbore casings; and  
wherein the lubricant comprises: a solvent carrier; a dry lubricant material in an amount less than 20% by weight; and an adhesive material.

8. (Currently amended) The assembly of claim 7, wherein the lubricant comprises, by weight percentage:  
47% to 50% methyl ethyl ketone;  
1 to ~~25~~ less than 20%, polytetrafluoroethylene; and  
the remainder, an alkyd polymer.

9. (Currently amended) An expandable tubular assembly, comprising:  
one or more tubular members; and  
a layer of a lubricant coupled to the interior surfaces of the tubular members;  
wherein the tubular members comprise underground pipes; and  
wherein the lubricant comprises: a solvent carrier; a dry lubricant material in an amount less than 20% by weight; and an adhesive material.

10. (Currently amended) The assembly of claim 9, wherein the lubricant comprises, by weight percentage:

47% to 50% methyl ethyl ketone;  
1 to ~~25~~ less than 20%, polytetrafluoroethylene; and  
the remainder, an alkyd polymer.

11. (Currently amended) An expandable tubular assembly, comprising:

one or more tubular members; and  
a layer of a lubricant coupled to the interior surfaces of the tubular members;  
wherein the tubular members comprise structural supports; and  
wherein the lubricant comprises: a solvent carrier; a dry lubricant material in an amount less than 20% by weight; and an adhesive material.

12. (Currently amended) The assembly of claim 11, wherein the lubricant comprises, by weight percentage:

47% to 50% methyl ethyl ketone;  
1 to ~~25~~ less than 20%, polytetrafluoroethylene; and  
the remainder, an alkyd polymer.

13. (Currently amended) An expandable tubular assembly, comprising:

one or more tubular members; and  
a layer of a lubricant coupled to the interior surfaces of the tubular members;  
wherein the lubricant comprises: a solvent carrier; a dry lubricant material in an amount less than 20% by weight; and an adhesive material.

14. (Currently amended) The assembly of claim 13, wherein the lubricant comprises, by weight percentage:

47% to 50% methyl ethyl ketone;  
1 to ~~25~~ less than 20%, polytetrafluoroethylene; and  
the remainder, an alkyd polymer.

15. – 148. (Withdrawn)

149. (Original) The assembly of claim 7, wherein the lubricant comprises, by weight percentage:

- 40% alkyd resin;
- 20% titanium dioxide;
- 1% calcium silicate;
- 22% methyl ethyl ketone;
- 15% polytetrafluoroethylene;
- 1% driers; and
- 1% levelers.

150. (Original) The assembly of claim 9, wherein the lubricant comprises, by weight percentage:

- 40% alkyd resin;
- 20% titanium dioxide;
- 1% calcium silicate;
- 22% methyl ethyl ketone;
- 15% polytetrafluoroethylene;
- 1% driers; and
- 1% levelers.

151. (Original) The assembly of claim 11, wherein the lubricant comprises, by weight percentage:

- 40% alkyd resin;
- 20% titanium dioxide;
- 1% calcium silicate;
- 22% methyl ethyl ketone;
- 15% polytetrafluoroethylene;

1% driers; and  
1% levelers.

152. (Original) The assembly of claim 13, wherein the lubricant comprises, by weight percentage:

40% alkyd resin;  
20% titanium dioxide;  
1% calcium silicate;  
22% methyl ethyl ketone;  
15% polytetrafluoroethylene;  
1% driers; and  
1% levelers.
